Digital IoT Real Estate Management
for Buildings, Offices & Industrial Plants

- ✓ Operate, monitor and manage your facilities digitally from the comfort of your home

- ✓ Get instant notifications for power trips, equipment faults or overcrowding

- ✓ Control your lightings based on occupancy and schedule the operations of your mission critical equipment using IoT

- ✓ Get valuable insights for your strategy and capacity planning using Machine Learning and Artificial intelligence

Pre-approved 80% IMDA Advanced Digital Solutions Grant is available on first come and first serve basis. Eligible for Singapore registered large local and small medium enterprises

USE CASES

Monitor energy consumption in your offices, buildings and industrial plants to drive energy conservation initiatives.

Reduce exposure to air contaminants and create a healthier and more comfortable work environment for your occupants.

Manage occupancy and reduce overcrowding within your workspaces, offices and buildings to ensure safe distancing compliance at all times.

Remote manage your equipment performance to improve productivity and reduce downtime that can disrupt your business.

Key Features at a Glance

Energy Management
