Zone Occupancy
Management

Determines if the zone or area is occupied. Best used for social areas which do not have clearly defined entries and exits.

Use Cases

Zone Occupancy and Optimization for event halls, hotel lobbies, building lobbies, public transportation platforms, large shopping malls

Types of Sensors Used

• Advanced Occupancy Sensor
• Motion Sensor

Hardware/Installation

• Ability to integrate data from existing systems
• Flexible and simple deployment options
• Gain strategic insights to drive capacity planning and crowd management

Key Features

View Real Time Zone Occupancy on a floor plan with information from different zones

Zone Occupancy Dashboard for tracking occupancy KPIs like capacity and utilization rates, people density

Trends & Heatmaps to view historical occupancy trends for zones

Set Alerts & Alarms when zone occupancy exceeds allowable limit for a location

Integration to 3rd Party Systems uses Open APIs that provide real time occupancy data

Mobile + Web Access

• **Mobile App** enables facility and office managers to have 24/7, 365 accessibility to zone occupancy

• **Web Access** centralises zone occupancy management and capacity planning through a single application
